Address: Near Southend Circle
Bangalore 560004
Languages Known: English, Hindi, Kannada
Date of Birth: 24th Feb 1996

PROFILE SUMMARY

- **Experienced Web Developer** with **4 years** of expertise in **front-end development**, currently contributing to **Includ.in** as a **Web Developer**, delivering high-performance, user-centric web applications.
- **Proficient in modern web technologies**, including **HTML, CSS, JavaScript, Typescript, React, and Next.js**, with a focus on building **scalable, responsive, and interactive user interfaces**.
- Strong skills to **integrate RESTful APIs and optimize performance**, ensuring seamless communication between **front-end and back-end systems** while enhancing application efficiency.
- **Expert in web performance optimization**, implementing strategies that improve **loading speeds, user engagement, and retention rates** through advanced debugging and optimization techniques.
- Demonstrates a **keen eye for UI/UX design**, ensuring accessibility, responsiveness, and aesthetic appeal, contributing to a superior digital experience for users.
- Continuously evolving technical expertise by staying updated with the latest **web development trends, security best practices, and cutting-edge technologies**, ensuring high standards of code quality and innovation.
- Skilled in improving application performance (e.g., **boosted app score from 37% to 67%**) and integrating APIs for seamless functionality

WORK EXPERIENCE

Jul'2021 to Present: Web Developer at Includ.in, Mumbai, Maharashtra, India

Role:

- Spearheading the development and maintenance of dynamic, responsive websites to optimize user experience.
- Utilizing HTML, CSS, JavaScript, and React Next.js to build and enhance web applications.
- Staying updated with industry trends and best practices to implement new technologies for improved efficiency.
- Conducting regular code reviews to ensure high-quality, efficient, and scalable code.
- Enhancing web functionality by troubleshooting and resolving issues promptly.
- Implementing new technologies to improve efficiency and ensure seamless performance.

PROJECTS

The Ladies Travel (Feb 2025 – Aug 2025)

- Designing and developing a WordPress-powered travel website to enhance user engagement.
- Customizing plugins and themes to improve site functionality and aesthetics.
- Implementing a dynamic content management system for seamless travel updates.
- Optimizing website performance and SEO to boost visibility and audience reach

Fantasy App (May 2023 – Aug 2024)

- Integrated real-time data visualization for player stats and league standings.
- Implemented secure user authentication and RESTful API communication.
- Built iOS and Android apps using React Native to enhance accessibility.
- Designed a responsive, interactive interface with real-time data visualization, secure authentication, and seamless API integration using React, JavaScript, HTML, and CSS.

Econut (Jan 2022 – Jan 2023)

- Built interactive product catalog pages with React, JavaScript, and CSS.
- Enhanced user experience with smooth navigation and filtering functionalities.
- Optimized performance, improving app loading speed, and user retention.

Atyeti (Oct 2021 – Feb 2022)

- Collaborated with the design team to create a responsive and visually cohesive UI.

Sqor (June 2021 – Oct 2021)

- Developed and optimized front-end components using React, Next.js, and Bootstrap.
